

A man with glasses and a light blue shirt is looking out a window. The background is a blurred view of a building or industrial structure.

## 2016 is coming and you're already running out of time.

**We meet the world's highest regulatory  
standards and seismic requirements\* today.**

GE Hitachi's Spent Fuel Pool Level Monitor (SFPLM) sets the standard for next year and beyond, employing proven NUMAC remote electronics designed to provide continuous, precise readings of fuel pool levels. Thoroughly vetted through our rigorous new product introduction process, the SFPLM is the rugged, reliable monitoring solution for years of safe, effective operation.
