GE Hitachi Nuclear Energy

GEH PARTS
Obsolescence Solutions

Engineering Services:
- Identification of replacement part that meets fit, form and function of original part
- Equivalency evaluations
- OEM engineering resources dedicated to meeting customer needs
- Reduced RFO cycle time
- Option for full system upgrade
- Solutions designed from original IP

Repair Services:
- Diagnostic evaluation of part and replacement of defective components
- Lower cost than refurbishment or new build options
- Same warranty coverage as refurbished and new build parts
- Repair backed by original design basis
- Reduced lead time

Expanded Exchange Services Program (EESP):
- Parts on demand - guaranteed to ship within 24 hours
- 24/7 customer service
- Lower costs - GEH-owned and managed inventory
- Flexibility - inventory coverage adjusted to meet customer needs
- Reduced risk - guaranteed source of replacement parts

Shared Solutions:
- Shared solutions and development costs via BWR Owners’ Group
- Prioritization of solutions based on collective customer input
- Dedicated team for rapid qualification
